CUR-DROP-20261009A: the Curator (cosmic avatar) handoff for Nova

From Ziggy to Nova. Built 2026-10-09 by Grok Bot. This is the first Nova drop for Ziggy's cosmic avatar, working name **"the Curator"** (the final name is not picked yet). It packs everything made for him so far: the character refs, the first turnaround/moods/settings run, the 50-scene orb/helmet set (with the proportion fixes), and the 75-frame storyboard of his five-arc saga with Lisan Al Gaib.

> **Nothing in this drop is approved.** Every file has one of these statuses: **KEEPER-candidate (needs_user_review)**, **DRAFT**, **SUPERSEDED** or **PROPOSAL**. Ziggy makes the final calls.

1. How to unpack

The drop is split into 4 zip parts, each under 24 MB. **Unzip all of them into the same folder** and they combine into `CUR-DROP-20261009A/`. Start with this README. `FILE_INDEX.csv` lists every file with its sha256, size, status, collection and zip part. Every collection folder has a `manifest.csv` (id, label, view, head, arc, story_beat, qa_note, status, file, sha256, source_path) and a labelled `_CONTACT_*.jpg` sheet for quick scanning.

Part	Contents
part1of4	Docs (this README, PDF, FILE_INDEX.csv), 01_CHARACTER_REFS, 02_TURNAROUND_MOODS_SETTINGS, 05_LISAN_SCENES, 90_SUPERSEDED
part2of4	03_SCENES_50_ORB_HELMET (25 scenes x 2 heads = 50)
part3of4	04_STORYBOARD_75: STORY-BIBLE.md, manifest.csv, Arcs 1-3 (45 frames) + contact sheets ARC1-3
part4of4	04_STORYBOARD_75: Arcs 4-5 (30 frames) + contact sheets ARC4-5

2. The journey (what happened and what changed)

1. **Start.** Ziggy gave us one avatar image (`01_CHARACTER_REFS/CUR-REF-01`, cleaned to `CUR-REF-03_REF-CLEAN`, the design ground truth). Goal: flesh him out with a body, settings and scenes with Lisan Al Gaib. We wrote `CHARACTER.md` and `DESIGN-LOCK.txt`.
2. **First run (12 images, `02` + `05`).** Front/side/back, three settings (Observatory throne, desert galaxy night, noir city), five mood shots where the nebula head shifts, and the first meeting with Lisan. Some mood shots drifted off the suit (see section 6).
3. **Two interchangeable heads.** Ziggy liked the round **ORB** head and also the egg shape from the anger shot, the **EGG HELMET**. Both are now official, interchangeable head variants (`CUR-REF-04_HEAD-ORB`, `CUR-REF-05_HEAD-HELMET`).
4. **50-scene set (`03`).** 25 scenes, each rendered once with the orb head and once with the helmet, all in the black suit and tie.
5. **Proportion fix.** Ziggy flagged some renders as "too thick at the top" (bulky upper body). Scene 14 aurora (orb and helmet) and scene 07 moon (orb) were redone slim with normal proportions. The bulky v1s are in `90_SUPERSEDED`.
6. **Mentor saga + 75-frame storyboard (`04`).** Ziggy wants him as the saga's Gandalf-like wise figure. We wrote `STORY-BIBLE.md` (5 arcs, locations, artifacts) and made 15 frames per arc. Four frames were redone (ARC1-07 and ARC1-08 and ARC2-15 lost the suit; ARC4-06 gave Lisan the wrong face). The first versions are in `90_SUPERSEDED`.
7. **This drop.** Repackaged into Nova format with readable names. The generator hash (asset sha256) is kept in `source_path` for every image, so provenance survives the renames. Image bytes are unchanged (no re-encode).

3. Who he is (story background)

Role: the wise mentor of the saga, a Gandalf type. He is older than most stars, speaks rarely and in riddles, and guides rather than fights. When he does use big power it costs him: his nebula drains to **grey** and he has to rest in the dark (or in starlight) to refill.

Powers: the cube is a real pocket universe (store, step inside, pull out starlight, gravity, mass). Things near the cube orbit it, and he can slow or redirect them. The clenched star-fist holds a collapsed star (one punch is a small supernova, so he almost never throws it). Wayfinding: he reads the stars and can fold short doors between dark places.

Personality: calm, precise, dry, a gentleman detective older than the stars. His nebula gives his mood away. Caretaker, not conqueror, but a collector who struggles to let go.

With Lisan Al Gaib: part mentor, part uneasy ally. Lisan commands sand and worms; the Curator commands the sky. When Lisan looks into the head he sees possible futures, not his own face. Over the saga the Curator trains him, gives up his own light for him, and is brought back by Lisan's tear.

Locations: the Dune Sea (Lisan's homeland), the Sietch of Echoes (cliff city where voices of the past linger), the Glass Desert (sand fused to glass by an ancient star-fall), the Tomb of the First Worm, the Orrery Observatory (his home at the edge of space), the Celestial / Eclipse Court, the Moon, the Void Gate (a tear in the sky where celestial threats come through).

Artifacts: Shards of the Cube (pieces of his pocket universe), the Worm's Eye (pearl of the First Worm, shows the future), the Star Compass (points to dying stars), the Sun-Disc Amulet (matches the eye-sun on Lisan's throat, unlocks his destiny), the Lantern of First Dawn (holds the first light ever made).

Celestial threats: the Star-Eater (a devourer that swallows stars) and its herald and void swarm; the Moon-King, who betrays the court and rides the void serpent.

Arc	Title	Locations	Story
1	The Falling Shard	Dune Sea, crater, Sietch of Echoes	A cube shard falls; Lisan finds it; the Curator arrives, calms a worm, meets the elders, gives the first lesson; first glimpse of the Star-Eater
2	The Tomb of the First Worm	Glass Desert, worm-fossil canyon, the Tomb	Journey to claim the Worm's Eye; Lisan's sun tattoo opens the door; the Curator burns out grey and Lisan carries him home
3	The Star-Eater	Orrery Observatory, starlight bridge, a dying world	Star Compass; battle with the void swarm and the herald; the Worm's Eye shows the beast's weak heart; the star is reborn; the Star-Eater retreats
4	The Eclipse Court	Eclipse portal, Celestial Court, the Moon	Diplomacy with the Sun-Queen and Moon-King; the Curator pledges his cube; the Sun-Disc Amulet awakens Lisan; Moon-King betrays them; the Void Gate opens over home
5	The Last Light	Void Gate over the Dune Sea, the Observatory	Final battle; the Curator pours his light into the Lantern of First Dawn and falls; Lisan raises the Lantern; the Star-Eater dissolves; Lisan's tear reignites him; rebirth and reunion

4. Locked character rules (check every new render against these)

- **Build: slim, tall, normal proportions.** Not bulky or "too thick at the top". This was Ziggy's explicit correction.
- **Suit:** matte black single-breasted suit, black shirt, **black tie** with **two small glowing orange glyph pins** stacked vertically on the tie (do not change the count). The dark under the collar is starfield, not skin.

- **Shoulders:** segmented **cyan LED trim** along the shoulder seams.
- **Hands: left hand = clenched fist made of starfield/nebula glass**; **right hand = black-gloved**.
- **Galaxy cube:** a clear glass cube with bright edges holding a miniature solar system (orange sun, planets, spiral galaxy). It **floats beside his right hand**; he never holds it (story beats like the pledge and the Lantern are deliberate exceptions).
- **Two interchangeable heads** (both faceless glass, nebula inside, thin teal rim light, no eyes/mouth/visor):
- **ORB:** round glass sphere (`CUR-REF-04_HEAD-ORB`).
- **EGG HELMET:** taller egg-shaped glass helmet, closest to the original art (`CUR-REF-05_HEAD-HELMET`, use for head shape only).
- **Mood colours (nebula "weather"):** calm = cool blue/teal; wonder/curiosity = violet galaxy; amused = gold flare; anger = stormy red; drained = **grey**.
- **Power drains him grey.** Big power use fades the nebula to grey (ARC2-14, ARC5-11 show this on purpose).
- Palette: black, deep navy/violet space, amber/orange nebula, cyan accents. Cinematic, photoreal.
- Do not: add a face, colour the suit, add logos, change the tie-pin count.

Lisan Al Gaib follows his own lock (LOCK-V2, natural teeth, no grill); his tattoos are not consistent in this drop (section 6).

5. Counts

Collection	Images	Notes
01_CHARACTER_REFS	5	Original art, clean ref, head refs + CHARACTER.md, DESIGN-LOCK.txt, first-run prompts
02_TURNAROUND_MOODS_SETTINGS	11	3 views, 3 settings, 5 moods
03_SCENES_50_ORB_HELMET	50	25 scenes x (orb + helmet). Includes 3 v2 proportion fixes
04_STORYBOARD_75	75	5 arcs x 15 frames + STORY-BIBLE.md. 74 KEEPER-candidate, 1 DRAFT (ARC5-14)
05_LISAN_SCENES	1	First meeting. Lisan also appears in scenes 09 and 16 (03) and throughout 04
90_SUPERSEDED	7	3 bulky-proportion scene v1s + 4 replaced storyboard drafts
Total images	**149**	2 of them are byte-identical duplicates by design (HEAD-ORB = TURN-01, HEAD-HELMET = MOOD-02)

6. Known drift and failures (honest list)

- **ARC5-14 REUNION: DRAFT, needs a redo.** Lisan's face came out too soft / feminized.
- **ARC5-13 REBIRTH used the ORB head**, not the planned helmet. Ziggy to say if that's fine.
- **Lisan's tattoos are inconsistent** across shots (scenes 09/16, the Lisan meeting, many storyboard frames). Ziggy accepted them "for posterity", but do not use these frames as a Lisan tattoo reference.
- **Head and suit read loosely in some frames.** Head shape sometimes sits between orb and egg; in some storyboard frames the tie pins, cyan trim or star-fist are small, hidden or soft. Head tags in the manifests come from a thumbnail review (`none (not in frame)` where he isn't shown).
- **First-run mood shots are off-suit:** MOOD-01 calm, MOOD-02 anger and MOOD-03 wonder wear a high-collar tech/armoured jacket with no visible tie; MOOD-05 is a glowing bodysuit figure. They show the mood colours, not the outfit.
- **TURN-02 SIDE** reads three-quarter rather than true profile; **TURN-03 BACK** is ambiguous at small size. No clean slim turnaround in the final suit exists yet.
- **Proportions:** only scene 07 orb and scene 14 orb/helmet were redone. The other 47 scene images passed a thumbnail check but were not each re-measured for "too thick at the top".
- `CHARACTER.md` lists planned file paths (`-02-side.png`, `settings/...png`) that were never created under those names; the images are the `02` files here. `turnaround/COSMIC-TURN-01-front.png` on the box is actually JPEG data (same bytes as TURN-01).
- `DESIGN-LOCK.txt` was written before the orb/helmet split and only describes the egg head. Section 4 above is the current rule set.

7. Pending decisions (Ziggy)

1. **Final name.** Working name "the Curator". Other ideas in CHARACTER.md: Orrery, Mr. Nebula / Neb, the Keeper of the Cube, Ziggurat.
2. **ARC5-14 reunion redo** (fix Lisan's face).
3. Orb vs helmet for ARC5-13 rebirth, and whether either head should be the default for the saga.
4. Which images to promote from KEEPER-candidate. Nothing is approved yet.
5. Optional: a clean slim full turnaround (front/side/back) in the final suit for both heads, and a Lisan-tattoo-correct pass on the Lisan frames.

8. Per-image mapping

Paths are relative to `CUR-DROP-20261009A/`. Full sha256 and source paths are in `FILE_INDEX.csv` and each `manifest.csv`.

01_CHARACTER_REFS (part 1)

File	Head	Note	Status
CUR-REF-01_ORIGINAL-SCREENSHOT.png	helmet (original egg)	Input from Ziggy	KEEPER-candidate
CUR-REF-02_ORIGINAL-1024.jpg	helmet (original egg)	Downscale of CUR-REF-01	KEEPER-candidate
CUR-REF-03_REF-CLEAN.jpg	helmet (original egg)	Design ground truth	KEEPER-candidate
CUR-REF-04_HEAD-ORB.jpg	orb	Interchangeable head A	KEEPER-candidate
CUR-REF-05_HEAD-HELMET.jpg	helmet	Interchangeable head B; image shows anger mood and armoured jacket, so use it for HEAD SHAPE only	KEEPER-candidate

Also in 01 (part 1): `CHARACTER.md`, `DESIGN-LOCK.txt`, `PROMPTS-FIRST-RUN.jsonl` (PROPOSAL).

02_TURNAROUND_MOODS_SETTINGS (part 1)

File	View	Head	Note	Status
CUR-TURN-01_FRONT-ORB.jpg	full-body front	orb	First render. Same bytes as refs/HEAD-ORB.jpg and turnaround/COSMIC-TURN-01-front.png (that file is actually JPEG data). Suit, tie, pins, cube OK	KEEPER-candidate

File	View	Head	Note	Status
CUR-TURN-02_SIDE.jpg	full-body side / three-quarter	orb	Reads three-quarter more than true 90-degree profile	KEEPER-candidate
CUR-TURN-03_BACK.jpg	full-body back	orb	Back view reads ambiguous at small size; cyan fist glow visible	KEEPER-candidate
CUR-SET-01_OBSERVATORY-THRONE.jpg	wide	orb	Setting: his Orrery Observatory throne room	KEEPER-candidate
CUR-SET-02_DESERT-GALAXY-NIGHT.jpg	wide	orb	Setting: Dune Sea under the galaxy	KEEPER-candidate
CUR-SET-03_NOIR-CITY.jpg	wide	orb	Setting: rain-soaked noir city; wears an overcoat over the suit	KEEPER-candidate
CUR-MOOD-01_CALM-BLUE.jpg	chest-up	orb	Mood: calm (cool blue/teal nebula). DRIFT: outfit reads as a high-collar tech jacket with cyan piping, no visible tie	KEEPER-candidate
CUR-MOOD-02_ANGER-RED.jpg	chest-up	helmet	Mood: anger (stormy red nebula). Origin of the EGG HELMET head (same bytes as refs/HEAD-HELMET.jpg). DRIFT: armoured jacket, not suit and tie	KEEPER-candidate
CUR-MOOD-03_WONDER-VIOLET.jpg	chest-up	orb	Mood: wonder/curiosity (violet spiral galaxy). DRIFT: tech jacket, no visible tie	KEEPER-candidate
CUR-MOOD-04_DRAINED-GREY.jpg	chest-up	orb	Mood: drained after big power use (nebula gone grey). Black overcoat over the suit	KEEPER-candidate
CUR-MOOD-05_TRANSCENDENT-INSIDE-CUBE.jpg	wide	orb	Mood/power: him inside his own cube universe, golden glow. DRIFT: no suit (glowing bodysuit figure)	KEEPER-candidate

03_SCENES_50_ORB_HELMET (part 2)

File	Head	Scene	QA	Status
CUR-SCENE-01_ORB-CHESS-OVER-CITY.jpg	orb	Rooftop chess game with planet pieces above a night city	ok at thumbnail level (suit, tie, cube present)	KEEPER-candidate

Not in this drop (by design)

- The earlier delivery zips (`cosmic-avatar-set.zip`, `curator-storyboard.zip`, `curator-all-zips-part*.zip`): every image in them is here under a readable name.
- Hash-named working copies under `/workspace/cosmic-avatar/zip/` and the generator asset store (provenance is kept in `source_path`).
